

FASTENER SELECTION GUIDE FOR EXPOSED METAL BUILDING AND ROOFING APPLICATIONS

Environments

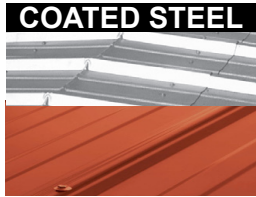

URBAN/RURAL
INDUSTRIAL
COASTAL/MARINE

Select a fastener based on the environment and the panel type.
To minimize galvanic corrosion, it is important that the fastener material is compatible with the roofing material. The following list of fasteners were selected based on specifications from various panel producers throughout the world. **Harsh environments can corrode metals quickly.** Contact the panel manufacturer for their specific recommendations.

NOTE: Electroplated zinc plated screws are not for use in exterior applications and will corrode quickly.

Use With Warranted Roof Systems

PANEL MATERIAL Fasteners

- Galvanized
- Zinc/Aluminum
- Painted Metal

CARBON STEEL TRI-SEAL COATED
URBAN/RURAL
INDUSTRIAL

***410 STAINLESS STEEL**
URBAN/RURAL
INDUSTRIAL

*Organic Coated or Zinc Plated

STAINLESS CAP
URBAN/RURAL
INDUSTRIAL
COASTAL/MARINE

ZINC HEAD
URBAN/RURAL
INDUSTRIAL
COASTAL/MARINE

304 STAINLESS STEEL
URBAN/RURAL
INDUSTRIAL
COASTAL/MARINE

Note: 300 series stainless may corrode the base metal in severe marine environments. Consult the panel manufacturer for specific conditions

For detailed product information, please view our product page located on our website or our PRODUCT QUICK FACTS sheet.

BLAZER[®] DRILL SCREWS

- TRI-SEAL Coated | Carbon Steel
- Stainless Cap or Zinc Head
- 410 Stainless Steel

PANEL-TITE[®] METAL-TO-WOOD SCREWS

- TRI-SEAL Coated | Carbon Steel
- Stainless Steel Cap Head Screws
- 304 Stainless Steel

TFC TAPPERS SELF-TAPPING SCREWS

- TRI-SEAL Coated | Carbon Steel
- Stainless Steel Cap Head
- 304 Stainless Steel

SD300 304 Stainless Self-Drill Screws

- 304 Stainless Steel Bi-Metal Drill Screws
